

Characterizing Federal Agency Assets

Objective - organize the assistance that Federal agencies can provide to address the state-identified needs in a format that is easily accessible and facilitates analysis

Audience/Users - Federal Working Group, State Working Group, other Partners

Array state-identified needs (as specific as possible) with:

- **Federal physical presence** (e.g., ACOE District Offices, NFWS National Wildlife Refuges, etc.)
- **Agency functions** (planning, monitoring, modeling, etc.)
- **Agency activities/projects** (current and proposed)
- **Programs providing funding/services** (NOAA Coastal Zone Management Program, CWPPRA, EPA 319 Program, etc.)
- **Other??**

Questions

- Has this information already been organized (don't reinvent the wheel)?
- What information should be collected and at what detail?
- How should it be collected (compile hard copy, web-based data base, etc.)?
- When should it be collected (summer '05, fall '05, winter '06, etc.)?
- Who will coordinate/lead data collection?
- How will we use this information (what is the analysis process)?

Information Overload - How Do We Avoid It?
